Great – thanks! This is good because it also reminded me that I’m actually responsible for checking numbers in a couple sections, too. I can’t wait for this monster manuscript to leave my life. 😊

Hi Geniece,

Thanks for your email! Actually, it was not intentional, but as you mentioned she is extremely busy at the moment, and I will make sure to check her sections when I check mine. Just added to my to-do list... 😊

Best,  
Raquel

Hi Raquel,

This might have been intentional, and if so, carry on – but, I didn’t see Robyn on the recipient list for this email (maybe I missed her), and if she was left off by mistake, I wanted to let you know. Maybe it’s because she’s going to be too busy with other stuff over the next couple weeks and someone else at ICF will check the numbers in her sections. So, anyway – if it was on purpose, that’s ok. I just wanted to alert you to it if it wasn’t.

Thanks,  
Geniece

**Subject:** FW: PCB evidence map manuscript - author revisions

Hi PCB evidence map manuscript co-authors,

Geniece has updated the draft manuscript to incorporate results from the 2020 literature update (please see attached). This version is currently under review by a few authors to respond to comments mostly related to this update.

Additionally, Courtney has updated the Tableau figures and they're available in HAWC [here](#). Each section author should check the highlighted numbers in their sections against the figures. Also, please review the figure legends associated with your figures – making sure that the descriptions match what's shown in the figures. If possible, please return your review by **October 11**.

If you need guidance on how to manipulate the Tableau figures, please click on the 'README' tab from any of the visuals (see screenshot below) to access that info. It should cover most of what you need to do, but let me know if you need additional help.

Have a great weekend,  
Raquel
